### Abstract

**Background and aims:** The teaching and learning of the University Statement and the significance of problems in China are organized in many forms, especially in the current era of rapid development in China's education, causing the university to modernize teaching methods. This paper aims to create a teaching model for dance movement courses and expand the scope of dance education.

**Materials and methods:** The study consists of four stages: reviewing relevant literature, using the Delphi technique to construct the platform, evaluating the suitability of implementing the model, and summarizing and presenting statistical data. The analysis reveals that the planned dance teaching platform includes various media such as WeChat, Mooc, Youku, Xiaohongshu, TikTok, YouTube, Line, videos, and television. Learners can search and select teaching assistants through public relations and establish admission criteria.

**Results:** The organization involves nine different styles of teaching and rehearsal, choreography filmed from the side with feet above the scapula, and providing feedback and suggestions for students' assignments in non-traditional environments. Choreographed competitions must be completed within a specified time frame and prepared for community teaching. Other aspects include dance competitions, dance routines, dance pairings, dance etiquette, and teaching Latin and standard dances. The scoring system for Chinese Frandiamond dance on platforms such as Xiaohongshu, Youku, Mooc, and TikTok is out of 20 points.

**Conclusions:** This study provides an applicable teaching model for dance movement courses, expanding the range of dance education.

**Keywords:** Platform; Model; Sport Dance

### Introduction

The teaching and learning of the University Statement and the significance of problems in China are organized in many forms, especially in the current era of rapid development in China's education, causing the university to modernize teaching methods such as Teaching methods are not only taught in the classroom but must be developed so that students can learn in all dimensions. for the convenience of students, regardless of whether students are in universities or students, they can live in their residences, so they can study all, it is a way to reduce the pressure on the learners to be happy, bright, and mentally healthy while studying. that Sound My in sound a body makes learners achieve their learning goals without causing stress because the body is relaxed, the body becomes flexible, the mind is bright, the mood is good, and the body is ready to be interested in studying continuously. Because the readiness that occurs both physically and mentally conveys emotional, social, and other aspects, it can be compared to the educational style of the teaching style that changes from the old monotony to concept. It is a new learning model that motivates and creates more creativity, making the learning style more diverse. Learners are more interested in studying. Improved learning success of learners (Gong, Z., 2022: 5)

Studying the form of Platform to find Sport Dream teaching because the university has been teaching since the 1950s and has been popular for distance teaching since the 1960s. The university that offers distance learning is Peking. University Capital Normal University with Beijing TV Station established Open University in the United Kingdom It was the first television university. It was officially opened for teaching and learning in the form of distance teaching with the development of television systems. A glance at the system characteristics of information technology systems which an inter-system and technology communication systems are more prosperous Until the educational system in China has developed in terms of teaching and learning. are that teaching and learning in a distance learning system has developed a teaching model to be taught in the form of Plat for the first time and has been continuously developed to the present day by using the platform to teach online systems such as MOOC? Xuctong Hujiang Online School New Oriental and Xueersi Online, etc. Most students are taught on a platform. using information technology Is to use mobile phones, and tablets, so students choose a platform to study and learn skills very well, thus causing the old educational management system to disappear immediately, the reason why students like it is because they don't have to. Enter the classroom itself. It shows that platform-based education management is popular. until now, therefore, this university supports education management and wants to use a platform education management system (Kuang, W., 2021: 16).

Organizing courses for teaching Dance Sports at this university. It has been teaching and learning for 10 years, but students are familiar with teaching and learning in universities. This is an advanced course that students must pass to study here. There must be a test from the evaluation test. For competition purposes only, basic movement classes are used. Therefore, it shows that the students are already capable and when they come to study here, they will have to study more advanced courses. Therefore, the Dance Sports curriculum must be modernized in teaching. Nowadays, it has to rely on information technology systems. Is teaching based on the main platform of teaching management must be more useful. What is more important is the need to organize teaching and learning in a variety of locations, offering opportunities to study thoroughly for the convenience of students. or when it is necessary not to teach face to face because of the outbreak of epidemics such as COVID-19 in the past or the inability of students to come to the university, teachers can send Dance Sport textbooks to reach students using mobile phones, and tablets. or television immediately and design principles of measurement and evaluation by allowing students to submit results of student practice to teachers for evaluation in that learning, which students will and methods of teaching based on the principles of the platform is, therefore, a convenient way for both teachers, students, and the general public to register with the university (Liu, F., 2022: 29).

The creation of a platform in the teaching and learning of Dance Sports allows students to of the university must certainly be interested. Because the formatting of the platform emphasizes the principles of information technology. cause many benefits from studies from other universities that have already been organized, such as the distance learning arrangement of Douy is to teach a dance course by broadcasting There is a person interested in this broadcast, becoming a train in information technology. Create a record of 1.09 million online participants, which shows that people are most interested in the form of organizing live broadcasts in the past in the past so the teaching of Sports subjects the university's dance this time must get the attention of the students. very much for that reason Students are convenient for teaching and learning in many dimensions, for example, students cannot come to study at the university. student infected with the epidemic The student lives far from the university. Students are distance students. The next facilitating thing is that students can immediately evaluate their results. When the students finish the lesson by submitting the results of their learning to the teacher, they can be assessed by an assessment form by testing from the platform, which is the form of Sports Dance of the teacher at that time. From the aforementioned reasons, it can be seen that the teaching and learning of Sports Dance based on the platform form is very convenient for students, including the general public who are interested in learning Dance Sport can study as well. From the teaching and learning model based on the platform (Li, C., & Shi, X., 2021: 22)

For the reasons mentioned above in the form of teaching and learning this university relies on information technology in the form of using plat from in teaching Dance Sports for students' learning. Because the researcher has studied the pattern of the problem and the history of teaching obstacles. that students do not have liquidity in the form of teaching and learning the researcher views that if one wants to solve the problem of Dance Sport instruction management successfully, one must choose the practical teaching method to teach Sport by using the method in the form of plat from. the researcher has thoroughly studied the problems of teaching and learning Dance Sports, therefore choosing to study the teaching style of Dance Sports by using plat from Because it will solve the problem of teaching and learning style that will increase convenience for students to study. and a plat from teaching Sport Dance, which can be used to teach other subjects at the university as well. Other universities can use the form of learning management teaching in plat format from can be used in the next sequence as well.

## Research Question

What should be the format of the platform for Sport Dance?

## Research objectives

This paper aims to create a teaching model for dance movement courses and expand the scope of dance education.

## Review of Literature

### 1. Management Function

Bridges and Roquemore (2019: 54) have classified administrative functions into similar sub-activities but grouped different sub-activities according to the opinions of each scholar. In this research, management functions are classified as follows.

**1.1 Planning:** Planning is about setting goals or objectives of the organization and defining methods to achieve the goals and objectives of the organization. It is deciding in advance what to do and who will lead. Planning is the determination and action to achieve goals or make them come true and step in setting operational goals and options, developing operating rules and procedures, as well as forecasting future outcomes. Planning is the selection of goals and developing methods or strategies to be able to achieve them.

**Summary The planning is as follows:** Planning is the setting of goals established as a result of the influence of personnel within the organization or from the influence of the external environment and other conditions or management systems by searching for ways or opportunities that will allow the plan to be carried out. To be at this stage the planner must Gather necessary information and facts allow all parties within the unit to fully express their opinions, and combine that information and opinions with the available resources. A forecast of future changes can be provided by translating opportunities into step 2 as a guideline for operations and the weaknesses of the plan must be identified and carefully considered. The management will work at this stage with rationality.

**1.2 Organizing:** Organizing a project is another administrative or management function that involves organizing groups of people, delegating activities, and establishing the formal authority and responsibility relationships between activities and departments to be completed. can end

#### **Organization system**

1. Directing Decentralization is to guide and motivate as well as encourage co-workers to achieve the goals of the organization effectively.
2. Command The command of the director must let the subordinate or worker know that he has to do what is the proper command.
3. Communication It is an exchange of information between individuals, both the receiver and the sender.
4. Leadership A leader is a person who has the power or influence to attract or motivate others to follow their orders.
5. Coordinating is a coordination between various factors to achieve common goals.

#### **Summary The organizing is as follows**

Organizational organization is the coordination of the process that must be provided with friends at every stage of the administration. It also helps to combine the factors in the administration to be harmonious. Organizationalization is an important administrative process that organizationalization will help. benefit as follows: Helps work to achieve goals smoothly and quickly.

#### **1.3 Implementing**

Bridges and Roquemore (2019: 30) have studied the meaning of action, meaning the implementation of various plans and projects by personnel in the organization. To achieve objectives and goals is an action concerning the management must guide the work of the person to achieve the organization's goals.

#### **1.4 Controlling**

Bridges and Roquemore (2019: 34) have explained that control refers to the duty of management to be carried out by all executives to monitor the performance of the orders that have been carried out. Command or not, if there is no control and inspection, then the executive cannot be sure that the various plans that the executive has prepared and instructed the subordinates to do will be successful.

### **2. Platform**

The platform is form seters to bass platform but the computer meaning form seter to the in-raster cure of a computer architecture that serves as a series tactility allow computer equipment and computer programs to run in the saner environment

#### **Platform can be classified as follows:**

1. Operating System and computer hardware, such as modern laptops running Windows as a computer operating system. "Standard System Architecture machine and/or operating system which is considered the basis of software applications;
2. Platform Mean; the context of various applications that facilitate people's use to connect with the digital world;
3. The context of modern business.
4. In modern business contexts, platforms often refer to tools that have business capabilities. or various technologies
5. Digital Marketing Platform means a solution that supports various functions within the scope of Internet marketing.

6. The dictionary defines the meaning Platform means something that acts as a platform, scaffolding, or platform so that people involved in the industry can connect or leap into business opportunities through a facilitating ecosystem of various operations that create cooperation.

#### **Summary The platform is as follows**

Marking a platform for use in teaching and learning management presents a form according to the characteristics of the take that is currently popular which will correspond to the take pack to create. Benefits in teaching, therefore, can improve and modify the form that will be used in teaching and learning to be used in and can be taught in every place in the form of a form (Kuang, W. 2021)

### **3. Models**

Pattern and bittern envelopment Meaning of pottery

As Kootz, H., & Donnell, H. (2017: 26) gavel a meaning about the format that Form refers to an object or thing that is used as a model for a certain action such as a model walks, model teacher, etc.

#### **Type of pattern**

Scholars have divided the pattern into five categories.

1. The analog model is a model that is related to physical systems and is a model real in physical science.
2. The sermonic model is a form that gives meaning to use in metaphor considering lounge.
3. A schematic model is a form used to write project plan charts.
4. Mathematical model is a form that determines the relation spirit of the coupon of an equation or a mothernotieal tuition
5. The Cansal model is a model structured as an alien question with Cansal variables and a hypothesis started

#### **Pattern development**

The development of the model is as follows. As Hicks H. C. said that

1. Models should consist of structural relationships retch Ethan line as ones
2. The pattern should guide the forecast as it happens the pattern can be verified
3. The model should indicate and point out the rational mechanism of the subject being studied.
4. The model should be a tool for conceptualization and the relationship of variables in nature

#### **A summary is as follows**

From the stenchy of model and model development, it was found that model development has different steps but may be divided into steps namely model building and figure precision. The model details each step in the process depending on the nature and legality of the matter.

### **4. Expert**

Expert means a person who has the knowledge and ability to comment on experience in any field for the work of recommending work to achieve the objectives according to the competency of expertise. and their own existing experience

1. Expert experience with research:
2. Advantages of Experts
3. Expert Preparation
4. Placement structure

According to the specialist position structure, there is a progression path to carry out the assigned responsibilities. Therefore, experts must be aware of the management of the proportion of creation and development of academic work with assigned work.

5. Contributing factors
6. Atmosphere
7. The Role of Expert in Academic Development

#### **Summary Expert is as follows**

A person who has expertise in expressing opinions and giving suggestions as invited Experts are essential to modeling research. which expresses the idea itself (Hick, H. G., 2016. p 27)

### **5. Focus Group Discussion**

Group chat is a way to One aspect of qualitative research is research in which a group process is used to collect data, identify individuals who participate in the process, techniques, and groupings, and determine research topics to be discussed among researchers and members of the group. The group looks like this:

1. Focus group discussion is a method that allows collecting data from a large number of samples in a short period.
2. It has a flexible structure that can be adapted for different research purposes and can be used with a variety of samples.

3. Researchers can choose as they wish, i.e., they can be used to complement other research methods.

4. The information obtained from the group discussion is information through the interaction of informants.

#### **The Limitation of Group Chat**

1. Group discussion techniques are limited.
2. The process of selecting a representative sample of the population to draw conclusions based on the research findings is quite difficult to carry out.
3. Group conversations require skills. Understanding and experience from facilitators will make group discussions successful.
4. If the moderator is biased A suggestive question that induces one's own opinions during the meeting will distort the answers received from the meeting.
5. This technique is qualitative data which is difficult to analyze and summarize.
6. The success of this process depends on the skill of the facilitator.
7. Identification of members with a half-similar nature is not so easy to do.

#### **Summary Focus Group Discussion is as follows**

The process of creating a focus group

Step 1 Define the research problem.

Step 2 Set a sampling frame.

Step 3 Define group chat moderators.

Step 4 Create/test the question line

Step 5 Select a sample group.

Step 6 Organize a group discussion.

Step 7 Organize the data.

Step 8 Analyze the data.

Step 9 Write a report

#### **Conceptual Framework**

In this study, the researcher used the management function of Bridge and Rogemore (2019) as a theory for constructing a conceptual framework.

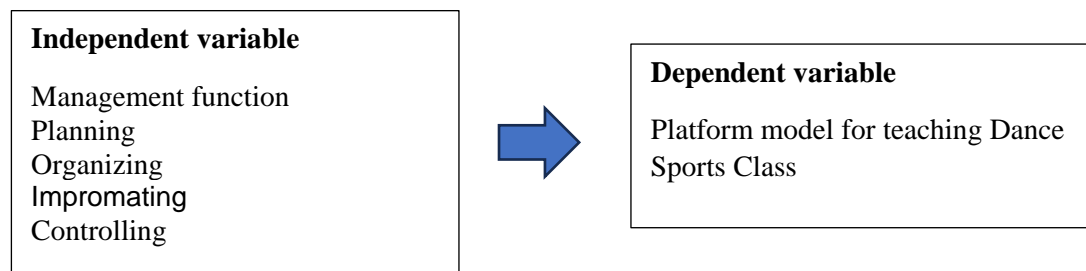

Figure 1 Conceptual framework

#### **Methodology**

Population and Sample: The population was 21 people selected by snowball experts. Administrators 5 people, knowledge of sports Dance 7 people and knowledge of platforms 7 people, a total of 19 people. Instruments are the management functions that are Planning, Organizing, Implementing, and Controlling. Data Collecting process, contact 19 experts, and interview experts in rounds 1, 2, and 3. Focus group, research consensus, summary pattern. Data Analysis were Median (MDN) and Interquartile Rang (IR).

#### **Result**

1. Planning that: Planning dance sports in the form of platforms such as WeChat, Video, Line, TikTok, T.V., Xiao Hong Shu, YouTube, and Youku Public relations planning for teaching dance sports in the form of platform. Planning leads to the benefits that will be gained from planning the practice.

Once Implemented, you must plan Further to submit the result to the dance practice as a form of dance that will be sent to the instructor for evaluation of whether to pass or not pass the evaluations.

2. Organizational arrangements for teaching dance sports are arranged with equipment arrangements, classroom arrangements with mirrors behind the scenes, camera angles for photography, lighting, and other elements. in teaching and learning, focusing on sports.

Teaching sports walking in today's era requires modern classrooms with steady equipment and can be studied at my time by Teach Up. formal by both inside and outside the institution can study any time both on and off Campus, Because Studying is the form of a platform in teaching.

### Discussion of research results

The research results of the platform model for teaching dance sports classes are as follows: planning and setting up a plan for making a platform by platform is to manage the creation in the form of platforms such as WeChat, Video, Line, TikTok, Mooc, and TV. Xiaohongshu, youtube, and youKu. and must tell students and people who go to Kmoer by public relations planning for teaching dance sports in the form of a platform. meanwhile teaching in the form of a platform can teach a good teacher can co-teach an unskilled teacher while a good teacher is at university but a good teaches is not at university and must plan for the selection of instructors according to the curriculum, along with planning the teaching platform program. as said by Wang, Y. (2020: 16) the curriculum. Planning a platform built to use teaching platform to think about the teaching planning for competition must have planning for information of teaching platforms there are planning to organize dance sports teaching equipment planning the dance sports for scoring which must plan to improve the curriculum to suit the current era. as said by Feng, X., Cao, J., & Huang, L. (2020: 43) the complete teaching principle of the platform a good platform must be created, presenting a format in the platform for organizing and evaluating results, creating a serious teaching style and must show everyone that there is a course that teaches like this in platform dance sports planning in the platform, it interested can university admissions must be between the ages of 18 and 21 which students must have a plan for selecting students as specified by the curriculum and managed dance sports instructor development plan for planning dance sports lessons without streaming as said by Jian, L., Zhou, X., & Chen, Z. (2020: 76) the teaching and learning in modern time can choose the learning model as needed, teaching can be born immediately and if in doubt, the qualifications of the teamers can fall for the exam bedance it is by the curriculum of the house in this era. Summary planning for teaching sports dance looks to be prepared in all aspects, such as planning the structure of the curriculum, and publishing to let everyone know the popular teaching channels, such as in the form of xiaohongsLu, Youku, MOOC and can be applied to WeChat, Video, Line, Tik Tok, etc. therefore, the process of planning a sports data lesson plan in the form of a platform can make a complete teaching plan. residents can plan to study anywhere because it is possible and correct according to the curriculum already in modern times organizing setting up a plan for making a platform by organizing the closing of the computer in the form of videos, Line Tik Tok, Mooc, WeChat TV, yooHoo and Youku and must have arranging video shoots for the dance cloth, such as taking the front, side, top at the waist and shoulders in the next spret organizing dance sports teaching assistants to control students' homework along with organizing dance sports teachers in the form of a platform and must organizing dance sports teachers in the form of a platform. As said by Li, C., & Shi, X. (2021: 23) that the organizational model for the platform must be consulted by those who have the ability to manage, prepare equipment arrange teachers, introduce learning methods, and so or, in odes to make teaching and learning quality and efficiency dance sport instructional design and must be organizing dance sports instruction in the form of a platform including organizing a place to teach dace sports in the form of a platform and have organizing dance sports teaching equipment in a form and must have arranging the necessary equipment for teaching dance sports in the form of a platform such as video cameras, microphones, audio systems, lighting systems, dance mirrors, etc. as said by Hu, Y., & Wang, K. (2021: 37) that organization arrangements for teaching and learning must be ready at all time, whether in terms of equipment that must be modern in order to encourage students to develop themselves for quality and officing for the teaching and learning model organizing sports instruction to complete the curriculum within one semester including must have organizing dance sports as a platform to teach people in the community have the opportunity to receive timely service and organizing equipment for teaching dance sports that requires a modern system and the choreography must have elements that are always evolving and up-to-date the university must have a project selection of students to learn sports dance in the form of a platform, which must be a person who is polite and organizing costumes for teaching dance sports. as said by Zhang, Y., & Wang, Y. (2020: 53) that teaching and learning management must be in accordance with the curriculum with lean elements. equipment to be provided to facilitate the management of outside, including organizing for the community as well.

summary organizing by getting the idea of a scholar who knows organizing, namely Mr. Hu, Y., & Wang, K. (2021), a composition such as organizing tools by Mr. Li, C., & Shi, X. (2021), including curriculum and management, learning to teach for the community by Mr. Zhang, Y., & Wang, Y. (2020), etc. implementing setting up a plan for making a platform by teaching basic movements each stroke preparation for filming by managing a dance sports video shoot filmed in style Shot front, side, above, feet above knee, waist and shoulder and teach the Basic movement tutorial with counting and music rhythm. In part dance sport instruction management in a mirror must be recorded slow dance arrangement as said by Guo, M. (2015: 47) said that to teach dance sports effectively, one must explain about floor the arrangement of the floor with mirrors, the basic teaching of both men and women by defining dance mover and must be measured and evaluated. dance with music and figure dancers need dance floor teaching line of dance as for some rhythms that do not need food such as Latin example teaching Latin rhythm and ballroom rhythm including teaching choosing a real man and real woman in dance sports and teaching figure for competition and teaching Beat-by-beat Flickr tutorial. as said by Guo, M. (2015: 61) said that good teaching of dance sports is that both students and instructors have to understand each other in the same direction learners must learn Latin and standard rhythms to achieve good quality and efficiency. proper figure arrangement teaching rhythms that are trending right now dance pairing tutorials and teaching dance etiquette. as said by Guo, M. (2015: 68) said that: As mentioned above, teaching and learning dance sports teachers must understand their context more students must learn more elements teachers must find a finger for competition, in the dance that is all-important that the instructor must teach the leavers to recognize for their father develop munt of dance. Summary Implementing the practice of creating a platform for teaching dance sports is very important at this stage because the results must be used by principles and objectives. Teachers and learners must understand each other's context. The facilitator must prepare all the equipment and places, the instructor must teach according to the curriculum, and the students must strictly follow to make the platform teaching dance sports teaching success. controlling up a plan for making a platform by arrangement for measuring and evaluating student performance and assessment assessment gives students grades from studying in each period that can be sent to teachers for evaluation of each period, including assessment score, look at the dance moves from the front side view, look at the feet and at the shoulders evaluation of teachers' grades using assessments and assessments Student interest ratings start from one, Xiaohangshu, second, TikTok and third you Ku out of 20 points out interest as said by Hu, D., Zong, B., Wang, B., & Zhang, W. (2020) said that plat making control torn must have a master to manage the evaluation. There are many forms, each with its own. context, such as student choreography assessment went teacher teaching assessment in the ferny of a platform different that can make a mark on whether that teaching operation succeeds or fails according to the principle of measuring and evaluating the teaching and learning management. tater, the person, was able to self-assess according to the specified form assessment of dance sport instructional videos as a platform interested parties can rate by writing a score under the video of the choreography and dance Sport students can assess teachers online by modern and timely assessment formatting so the exam, if not passed the first time, can retake the exam and send it to the teacher for evaluation and the teaching control for platform of dance sports as said by Cao Honglei (2020: 36) that said evaluation at this stage is very important as an evaluation in all aspects will have good results. it is necessary to study the teacher's choreography assessment teaching format and evolution of the teaching of the learners. assessment must alary. be designed to be up-to-date, and suitable for current times. For accuracy and reliability of the assessment pawn itself controlling the transmission of dance sport teaching video format into the closed system foam rubber thoroughly and teaching dance sports in the form of diamonds can be traded if the video is popular so people who are interested in watching sports dance instruction online and are interested in learning dance sports, please come to the classroom, but have to pay for the lesson and must evaluation of teachers using measurements from standard university assessments. assessment students can assess after teaching dance sports for instructors every session upon completion of the teaching. In the end assessment of the curriculum, each semester of dance styles, teaching styles, and learning styles for curriculum modernization controlling the sequence of measurement and evaluation steps in the final part will assess the organization whether the teaching and learning process is by the curriculum or not because at this stage there may be Involved. Therefore, there must be a good evaluation showing that the platform in teaching is satisfactory. The evaluation must evaluate the current curriculum whether it is good or not. Further development summary controlling mastering a platform for teaching dance sports It is very interesting because many things must be assessed, including organizations, teaching, teaching, learners, courses, and management levels. Everything must be in the same direction when there is a good service. resulting in income, therefore it is necessary to always have perfect development in all areas, is a great challenge to be able to make it acceptable in the future.

### Research suggestion

1. Planning the new platform we need to time more information about the platform to choose the form of marking more forms
2. Organizing it must speciously ask for cooperation with the university in preparing equipment for the glass room used to teach sports dance, lighting systems, sound systems, cameos to have rouge numbers and to time more sprouts
3. In terms of fact students must be informed but firmly and the sequence of steps for teaching and learning; when and what students must prepare to learn sports Dantron platform
4. In terms of measurement and evaluation, a variety of evaluation forms must be developed to facilitate the teaching and learning of students in the form of platform teaching
